

Maximilian Horster
Managing Director
ISS ESG

@issesg

Maximilian Horster founded a pioneering investment & climate change specialist (South Pole) in 2009. He developed leading methodologies to measure investment climate risks across asset classes. He leads several EU-funded projects on climate change and finance. He introduced the first climate focused fund rating and the first climate-linked proxy voting service and he also heads the only dedicated climate team of a global ESG service provider. Maximilian loves the mountains, his wife and his 4 kids (not in that order.)
